JT Cyrax Slab Thin pt. 15,5, English

Jules Verne was noted for his attention to detail and scientific accuracy, especially in the novel *Twenty Thousand Leagues Under the Seas* (1870). In 1887, the novel *El anacronópete* by Spanish author Enrique Gaspar y Rimbau introduced the first time machine. An early French/Belgian science fiction writer was J.-H. Rosny aîné (1856–1940). Rosny's masterpiece is *Les Navigateurs de l'Infini* (*The Navigators of Infinity*) (1925) in which the word astronaut (*astronautique* in French) was used for the first time. Many critics consider H. G. Wells to be one of science fiction's most important authors, or even "the Shakespeare of

JT Cyrax Slab Thin pt. 15,5, German

Science-Fiction, auch Sciencefiction geschrieben (englisch science: Naturwissenschaft, fiction: Fiktion), ist ein Genre in Literatur (Prosa, Comic), Film, Hörspiel, Videospiel und Kunst. Charakteristisch sind wissenschaftlich-technische Spekulationen, Raumfahrtthemen, ferne Zukunft, fremde Zivilisationen und meist zukünftige Entwicklungen. Auch die englische Schreibweise Science Fiction ist gebräuchlich und in der Fan-Community weit verbreitet. Übliche Abkürzungen sind Sci-Fi oder SciFi (, auch ) sowie SF. Synonyme sind Zukunftsroman, -literatur, -film, Wissenschaftliche Fantastik. Verwandte Gebiete, die nicht zur SF

JT Cyrax Slab Thin pt. 15,5, Polish

Fantastyka naukowa jest gatunkiem trudnym do jednoznacznie zdefiniowania. W 1953 Isaac Asimov określił ją jako „gałąź literatury zajmującą się wpływem rozwoju nauki na istoty ludzkie”, jednak nie ogranicza się ona jedynie do opisu kwestii postępu naukowego i jego konsekwencji. Współcześnie gatunek charakteryzuje się wielką różnorodnością formalną i tematyczną. W dużym uproszczeniu: Postaci mają możliwość korzystania z wynalazków, które nie zostały wynalezione w dniu wydania utworu. Np. wehikuł czasu, teleporter, pojazdy zdolne do prędkości nadświetlnej, pojazdy napędzane antygravitacją, sztuczna grawitacja, broń

JT Cyrax Slab Thin pt. 15,5, French

La science-fiction est un genre narratif, principalement littéraire (littérature et bande dessinée), cinématographique et vidéo-ludique. Comme son nom l'indique, elle consiste à raconter des fictions reposant sur des progrès scientifiques et techniques obtenus dans un futur plus ou moins lointain (il s'agit alors également d'anticipation), parfois dans un passé fictif ou dans un univers parallèle au nôtre. Elle met ainsi en œuvre des progrès physiquement impossibles, du moins en l'état actuel de nos connaissances, donnant les thèmes classiques du voyage dans le temps, du voyage interplanétaire ou interstellaire, de la colonisation de l'es-

JT Cyrax Slab Thin pt. 6

Jules Verne was noted for his attention to detail and scientific accuracy, especially in the novel *Twenty Thousand Leagues Under the Seas* (1870). In 1887, the novel *El anacronópete* by Spanish author Enrique Gaspar y Rimbau introduced the first time machine. An early French/Belgian science fiction writer was J.-H. Rosny aîné (1856–1940). Rosny's masterpiece is *Les Navigateurs de l'Infini* (*The Navigators of Infinity*) (1925) in which the word astronaut (*astronautique* in French) was used for the first time. Many critics consider H. G. Wells to be one of science fiction's most important authors, or even "the Shakespeare of science

fiction". His novels include *The Time Machine* (1895), *The Island of Doctor Moreau* (1896), *The Invisible Man* (1897), and *The War of the Worlds* (1898). His science fiction imagined alien invasion, biological engineering, invisibility, and time travel. In his non-fiction futurologist works, he predicted the advent of airplanes, military tanks, nuclear weapons, satellite television, space travel, and something like the World Wide Web. Edgar Rice Burroughs's novel *A Princess of Mars*, published in 1912, was the first of his thirty-year planetary romance series about the fictional Barsoom; the novels were set on Mars and

#### Licensing

July Type offers two usage scenarios, standard and extended. The specific license type is indicated on the invoice provided to the Licensee. License upgrades may be necessary if the Licensee's Company Size surpasses the limits outlined in the License Metrics section of the invoice.

#### Standard License

Standard License allows the Licensee to use the typeface software to create printed and digital assets, such as documents, books, objects, merchandise, signage, and more, for a single brand. Terms and Conditions: The Licensee may install and use the typeface software on all devices within their organization for the purpose of creating the aforementioned materials. Each client using the typeface software for distinct brands must acquire their own license. Modification, renaming, or conversion of the typeface software is strictly prohibited. Sharing, selling, leasing, or distributing the typeface software to third parties is prohibited.

#### Extended License

The Extended License allows the Licensee to use the typeface software to create both printed and digital assets for a single brand, including documents, books, objects, merchandise, signage, websites, social media content, video and motion graphics, broadcasting, streaming, and digital advertising. The license also covers the use of the typeface software in WOFF

and WOFF2 formats through the @font-face CSS method for a single web domain. The typeface software may be used only on websites owned or controlled by the Licensee under the licensed domain name, including sub-domains. There are no restrictions on web traffic for the licensed domain. Any additional web domain requires a separate license. Web design agencies and hosting providers may not share a single Webfont License across multiple clients or websites. The typeface software may be used on websites where visitors create styled content using the fonts for text input or editing; however, such content may not be exported or used outside the website itself, including for merchandise, PDFs, image files, or physical products. The Licensee may not modify, convert, or edit the typeface software except for creating subsets when technically necessary. The use of the typeface software with technologies other than the @font-face method is not permitted. The Licensee must also take reasonable measures to protect the typeface software from unauthorized access, including preventing hotlinking and restricting direct downloads unrelated to styling text on the licensed website.

#### JT Student Pack

Students may use the typefaces in the student package to create any self-initiated work, whether non-commercial or commercial, throughout the duration of their studies. After completing their studies, fonts may continue to be used for the self-initiated works, for example portfolio website, music album cover, tshirt, etc. If students take on client work, either during or after their studies, the student package is no longer valid for these projects, and a separate license must be purchased by the client using the standard license metrics, based on company size and license type.

#### About

July Type is a type design studio founded by Edward Dźwiałaj in 2023 in The Hague. The Studio specializes in providing users with high-quality retail and custom typefaces, combining historical knowledge with contemporary letter design craft for a global audience. Language support is paramount to us, and we devote significant attention to ensuring our fonts are accessible and usable across a diverse range of languages.

#### Rafał Buchner

JT Cyrax Slab + JT Cyrax Sans  
Rafał Buchner is a Warsaw-based type designer, coder, and typographer who merges type design with creative coding. He develops fonts and drawing tools at Typotheque. With a master's degree from the Type & Media program at KABK and a background in Graphic Design from the Academy of Fine Arts in Warsaw, he has designed books, collaborated with cultural organizations, and taught Book Design as an assistant teacher. Rafał is dedicated to pushing the boundaries of type technology, helping other designers streamline their font development workflows.
